How to solve

Each puzzle fills a two-page spread: the clues are on the left-hand page and the grid is on the right, so you never have to turn back and forth while you solve.

Every white square belongs to both an Across word and a Down word, so each letter you write helps with a crossing clue. The small number in the corner of a square matches a numbered clue.

Answers are everyday words, three to five letters long. The puzzles start easy and get a little trickier as you go.

Puzzles 1 – 40	Easy
